to everything there is a season...

Every day is a celebration of life that revolves around nature's cycles. The morning sun gives way to the evening stars. Winter awakens from its nap to burst into spring. The exuberance of the young matures into the experience of the young at heart. What better way to celebrate the rhythms of nature than on our charming Texas ranch. Walk with us as the sun illumines this vast expanse of the Hill Country. Inspired by the traditional harvest of Texas herbs and wildflowers, you can almost hear the sounds of ranchers from days gone by tending to this bountiful and healing land. At the Windflower Hill Country Spa, your celebration has been carefully designed to pay homage to nature's cycles. Whether you need the rejuvenation of spring, the exhilaration of summer, the reflection of fall, or the balance of winter, we can immerse you in the holistic, healing powers of the seasons. We'll provide food for the body and food for the soul, in harmony.

timeless rituals

indulge in a ritual all your own

The following “aromasoul massage rituals,” which can be experienced on their own, are based on the essential oil selected by the guest, or determined by the description of treatment benefits. They can also be experienced as a journey through the world of therapeutic care, as a path to discovering one’s ancient soul. We believe that each of us resonates with different cultures and energies, regardless of where we are from or our own family background. These treatments represent the care and spirit of ancient cultures and the pure energy of one person offering care and healing to another.

Each of the rituals includes a facial, which will be customized by your therapist.

wanderers ritual 2-1/2 hours \$295

Immerse yourself in the revitalizing spirit of Oriental therapy, with a powerfully therapeutic pressure-point massage, balanced with gentle floral essential oils. Elements of jasmine, ylang ylang, acacia, and vanilla (floral) are used to create a spirit-energizing, mind-opening, and body-stretching effect. This is based on the ancient massage therapy of China, called “tui-na,” which means pushing/grasping. It is a blend of pressure points, strong vibration, and opening movements, as well as gentle energy stimulation. It is a treatment that gently encourages the realignment of the bones and the perfect flow of vital energy. It is highly recommended after traveling, or for a lifestyle that involves extended driving or sitting, as it completely stretches and realigns the body and energy channels.

timeless rituals

coastal ritual 2-1/2 hours \$295

Renew yourself in the warmth and joy of the Mediterranean and the influence of the sea, as the waves nurture your spirit through the gifted hands of our therapists. Elements of lemon, basil, bergamot, oregano, anise (citrus-herbal) are used for a relaxing and purifying effect that releases stress and tension.

This harmonizing massage reflects the spirit and warmth of the Mediterranean, symbolized by the sea and the movement of waves—sometimes gentle, sometimes powerful, but always moving, always purifying, always allowing us to release our stress and tension. We must become empty first, if we are then to become fulfilled and renewed. This massage feels like beautiful waves dancing over the body—very fluid, soothing, mesmerizing. Our Oriental and Mediterranean treatments both connect to the seasons of spring and summer, as in Oriental philosophy; they symbolize rebirth and renewal, renaissance, beginning again.

harvest ritual 2-1/2 hours \$295

Revitalize your spirit with the vitality of Ayurvedic philosophy, in a treatment that warms and energizes you completely, leaving you feeling strong and vibrant. Elements of cardamom, ginger, black pepper, patchouli, and nutmeg (spice-herbal, warming) are used.

This treatment blends several approaches to Ayurveda, the “life science” of India. Massage in India is very much a family affair, as it is considered a basic, nurturing need of daily life. In fact, newborns are massaged every day for the first 18 months of life. Indian massage is strong and stimulating, designed to bring fire and vitality back to the body, and then to spread that vital energy throughout the body.

timeless rituals

tribal ritual

2-1/2 hours \$310

Nurture your soul in this remarkable, embracing ritual massage, surrendering to the peaceful spirit of the desert as you rediscover perfect mind and body equilibrium. Elements of vetivert, amyris, cinnamon, elemi, cedarwood, and geranium (spice-sweet) are used to create a grounding, deeply calming, nurturing effect.

This unique ritual treatment is inspired by the nomadic Tuareg and Berber tribes of southern Arabia and northern Africa, and by a healing and rejuvenating treatment offered especially for the traveler—the ones living a life of movement, perhaps of solitude, needing to be balanced by becoming reconnected to their physical strength.

This treatment removes stress and reconnects us to our body awareness layer by layer. We begin with a skin-renewing exfoliation that gives energy at the same time. This is followed by an initial compression and contact while you are still under layers of warm linens. The process is completed with a massage—a gentle but profoundly energetic movement called “wind on the sand,” where the hands glide along the skin, gently encouraging deep breathing and release of muscle tension, always with the same slow and steady touch.

Both the Indian and Arabian treatments connect to the seasons of autumn and winter, as they are warming. They symbolize the desire to rebuild and renew energy and life-force (Indian), and then finally to feel our roots and our wings (Arabian)—to feel that we are strong and stable and ready to continue our journey with new strength and awareness.
